www.sap.com/belux/education

In today's fast-moving, competitive business environment, successful companies are those that succeed in staying on top of their game. Their secret? The talent and skills of their employees.

SAP Education works with SAP customers, business partners and employees to build a culture of continuous blended learning. Clients rely on SAP Education to get initiated into SAP software and maximize the value of their IT investments. Partners and Independent Software Vendors (ISVs) deepen their SAP knowledge to foster their customers' trust and generate new business.

Benefits for your organization :

- direct impact on the enterprise process efficiency
- optimized user acceptance and performance
- decrease in support requirements, help desk and IT expenses
- 1 Flanders-based companies can even apply for subsidies from the Flemish Government, resulting in savings of 50% on training and consulting costs. (www.kmo-portefeuille.be)

Benefits for the student :

- high quality and comprehensive training delivered for different target groups
- innovative new flexible training methods of knowledge transfer answering to your specific training needs
- extensive demo and exercise data used during the training
- perfect harmonization with the original SAP documentation
- efficient use of the IT SAP Tool
- wide network of reliable professional trainers
- global consistency and quality in more than 40 countries

Whatever formula you choose: your investment in SAP Education is a smart investment in your company's future.

SAP EDUCATION FOR CUSTOMERS: **BUILD YOUR SKILLS TO BUILD YOUR BUSINESS**

SAP software is a great tool to optimize your business processes and fuel growth. But it may prove less than cost-effective if your people don't have the skills to use it correctly and intelligently.

SAP Education provides a wide course offering for your IT staff. Whether they are new to SAP or want to improve their SAP knowledge, we can help them build their skills ... to build your business.

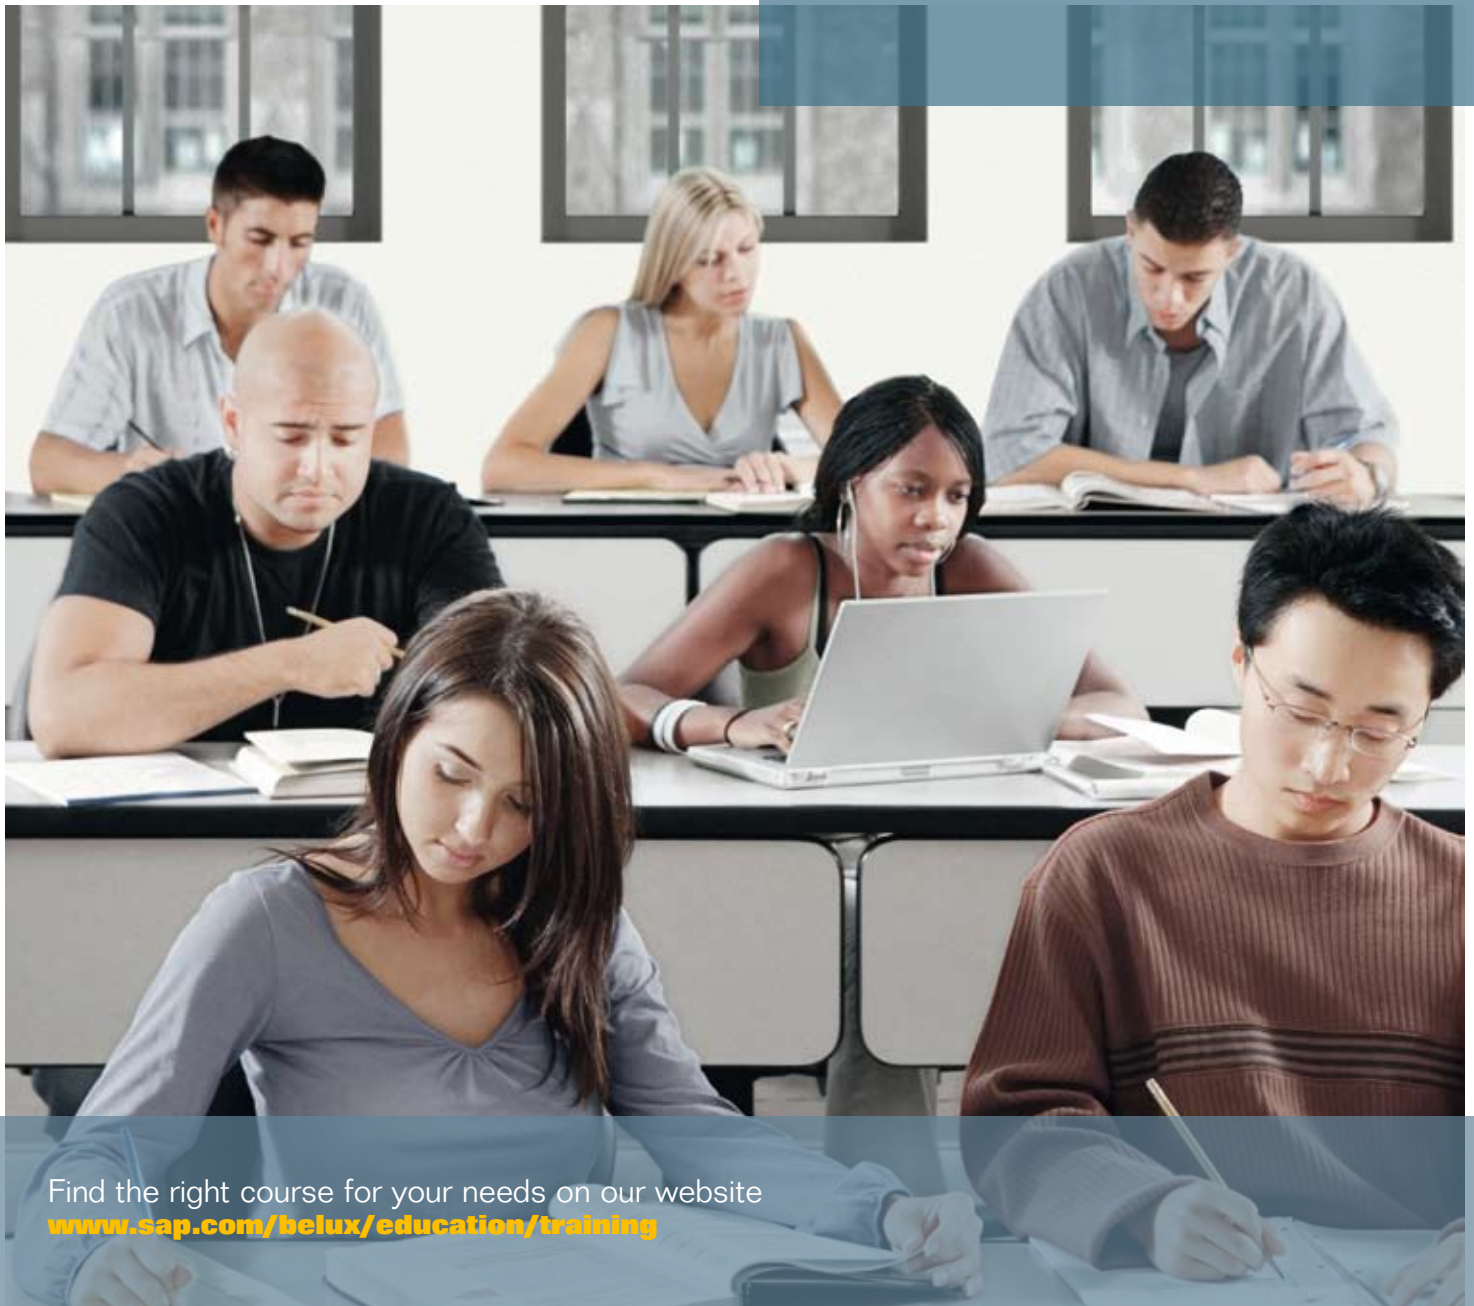

The SAP Education offering is super versatile and adaptable to every company's objectives and budget.

EDUCATION-RELATED
SOFTWARE FROM SAP:

OPTIMIZE YOUR LEARNING ENVIRONMENT TO DRIVE ROI

Besides taking advantage of the broad range of SAP Education courses, you can also benefit from SAP's education-related software products: intuitive and easy-to-install tools that will help you design, disseminate and assess information and education in a consistent way, throughout your organization. The result: increased productivity and a greater return on your IT investment.

SAP Productivity Pak and SAP Productivity Composer by RWD:

Two suites of software tools that include documentation, context-sensitive online help, and transaction simulations – designed to make life easier when generating documents and content for SAP software.

SAP Enterprise Learning:

A comprehensive learning environment that integrates business processes, content development, and the delivery of learning linked to employee performance.

SAP Acrobat Connect Professional Meeting and Professional Learning:

Two powerful applications that help you build internal knowledge networks, share information, communicate.

SAP BusinessObjects Knowledge Accelerator

A customizable, web-based learning and support product that gives you out-of-the-box training and support.
