

SIEMENS

SIEMENS CIO

The Siemens Corporate Information Office is using the SAP NetWeaver® platform to provide the flexibility to fulfill future requirements. Together with HiPath Slcurity DirX Identity from Siemens Communications, the SAP NetWeaver Portal component provides centralized access to all business-critical SAP® and non-SAP applications based on single sign-on and a unique user interface.

Siemens Business Services

AT A GLANCE

Key Challenges

- Harmonize business processes and portal infrastructure for all Siemens business units in more than 2,000 locations in 160 countries
- Provide secure access to the network
- Ensure consistent access to all business-critical applications

Implementation Highlights

- Accessibility of all SAP® and non-SAP applications through single user interface
- Certified technical alignment

Key Benefits

- Flexibility for satisfying requirements of specific business units
- Unique user experience for all Siemens employees
- Improved system security
- Reduced administrative cost
- Simplified user management and rollout of new applications throughout Siemens
