

AutoEdge

A KPIT SAP Solution- for Automotive Component Manufacturers

Developed on SAP ERP, **AutoEdge** is an enhanced solution based upon the “Best Practices” For Automotive Component Manufacturers combined with KPIT Cummins domain experience gained from the implementation done in this vertical. The result is a Substantial reduction in the “**Total Cost of Ownership**” through faster implementation, business-ready- scenarios and fewer customizations.

AutoEdge for Automotive Component Manufacturers replaces fragmented distributed systems, disparate technologies and manual process with a flexible, scalable & maintainable blueprint solution for Indian Small & Medium enterprise (SME) that lets you add new core process as your business grows. **AutoEdge** puts the power of integrated core business within the reach of mid sized AUTO component companies, no matter what production model is used.

AutoEdge enables adaptive Manufacturing by closing the vital information loop between the plant floor and the enterprise resulting in a real time visibility into crucial business process from design, production and scheduling to inventory, quality and after-sales, allowing quick response to changes.

Industry Segments

- Automotive Component Manufacturers
- Tier I & II Suppliers

Our Templatized solutions help you realize *value faster*

- 74+ SAP Best Practice Scenarios & 45+ KPIT developed Biz. Scenarios Configured, Templatized for Auto Comp Industry, Tested and Implemented
- Value of Information making improved
- Improved Response Time for any key decisions
- Integration across functions and processes
- Shorter Implementation Time for lower TCO
