# SAP<sup>®</sup> Business All-In-One Solution For the Specialty Chemical Industry

## Out-of-the-box Industry Functionality

ChemOne is an SAP Business All-In-One solution, developed by YASH for the Indian Specialty Chemical Industry market. Based on pre-defined, industry specific business scenarios tailored to India, ChemOne delivers a comprehensive set of business functionalities with little or no customization required. This means your organization can rely on the predictability in costs, risks, and project durations to ensure successful end-user adoption and continuous business improvement. ChemOne provides a host of business benefits, including operational efficiency, increasing employee productivity, and responding to market demands with agility.

The chemical industry faces unique challenges of regulation compliance, lot tracking, and hazardous materials processing. Small and mid-sized chemical companies must respond to these challenges with fewer personnel, financial, and IT resources.

ChemOne, a robust SAP Business All-In-One Solution for the chemical industry, provides the ability for small and mid-sized enterprises (SMEs) and also larger organizations to gain visibility into the business, control costs, and provide better supplier integration to maximize margins for profitable growth. As a fully integrated, pre-packaged ERP solution, ChemOne can be implemented quickly, in a matter of weeks, to speed ROI and business benefits.

ChemOne, built on SAP Best Practices, is designed to produce results out-of-the-box. In addition, the solution has been tailored for the Indian market, in terms of taxation and compliance norms. Based on pre-defined, industry specific business scenarios, ChemOne delivers a comprehensive set of business functionalities with little or no customization required. As a full-service provider, YASH can get you up and running fast, and with a

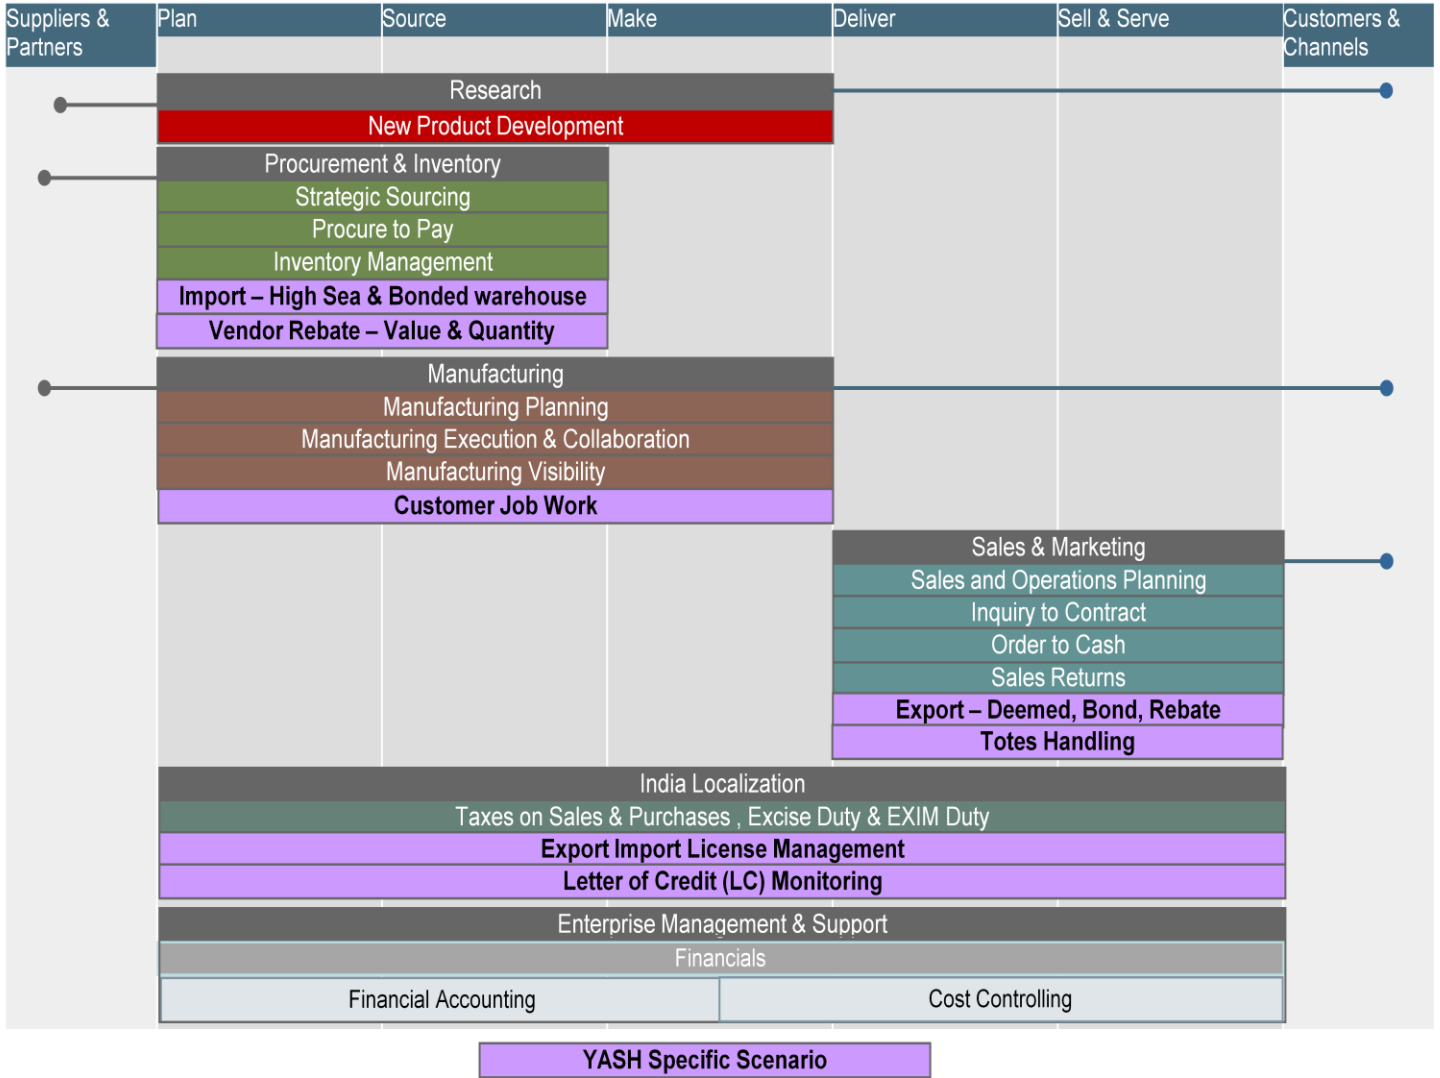

fixed price and timeline. The implementation is backed by a suite of support services that will help you to derive maximum benefits out of your ChemOne investment.

ChemOne allows real-time information integration for complete control of your business operations - you'll know what's in inventory, on the manufacturing floor, down on the dock and out of the door.

Everyone from procurement staff and production planners to sales and customer service agents, onsite or offsite, will have a clear view of plant information to set customer expectations, make smarter decisions, and control costs.

In addition, tracking and managing plant-wide data makes compliance reporting easier, and integrated processes tighten the billing cycle and automatically trigger invoices. It's clear to see why end-users rely on ChemOne to provide continuous business improvements.
