

## ChemOne<sup>®</sup> AN SAP<sup>®</sup> BUSINESS ALL-IN-ONE SOLUTION FOR THE SPECIALITY CHEMICAL INDUSTRY

### Out of the Box Industry Functionality

As a mid-sized chemicals manufacturer, you face challenges some of which are very specific to your industry. As you move out of the startup mode, there is a bigger necessity for IT systems to play a role in managing and directing your growth. A robust IT system can take of day to day business transactions and also provide a competitive ad-vantage in the short and long term.

ChemOne is an SAP Business All-in-One solution, developed by YASH for the Indian Specialty Chemical Industry.

Based on the philosophy of preconfigured building blocks, ChemOne can be deployed rapidly within a fixed time frame and scope range. The solution is localized for India and also covers a range of regulatory compliance business processes.

ChemOne can provide a host of business benefits ranging including operational efficiency, employee productivity and the ability to respond to change with agility

That's why YASH created ChemOne, an SAP Business All-in-One solution for small and midsize enterprises in the chemicals industry. As a pre-packaged SAP Business All-in-One solution, ChemOne incorporates industry best practices for all of the standard operating processes applicable for a chemicals manufacturing company – integrating business process flows across functions.

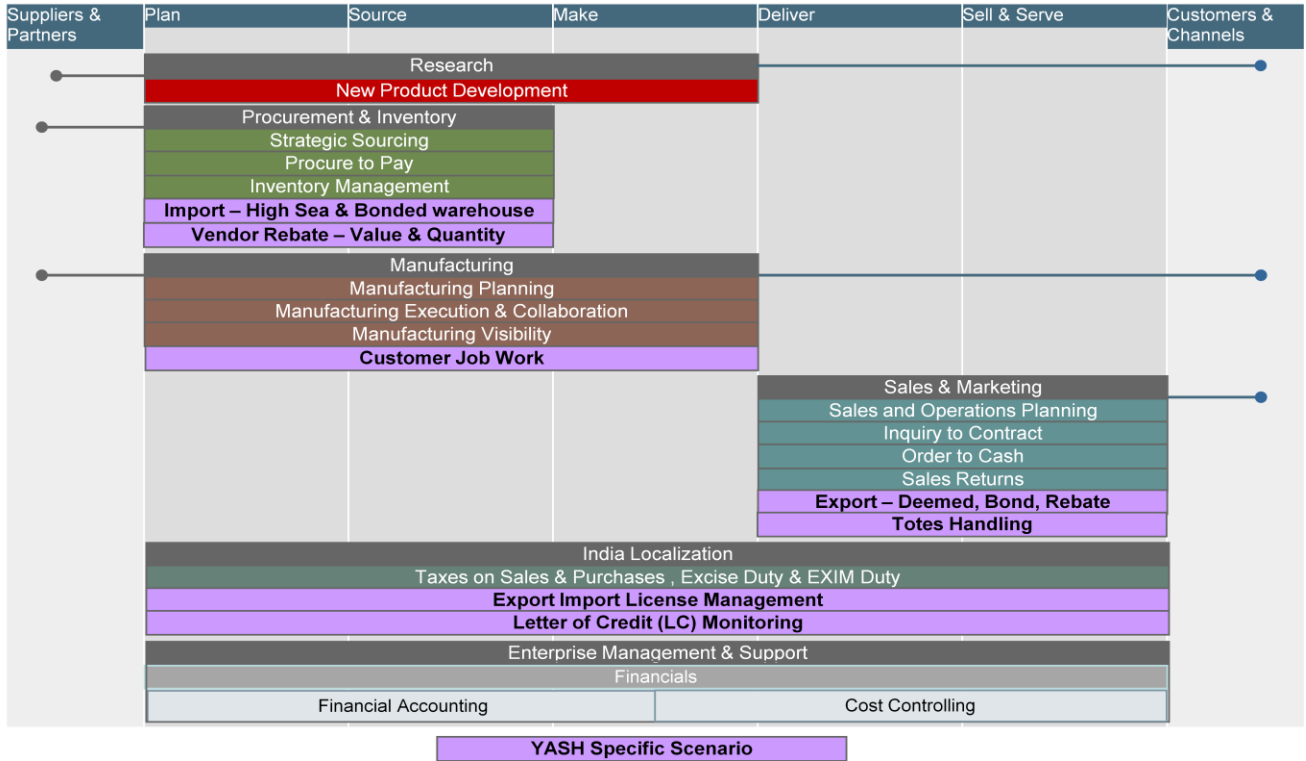

With industry best practices built into the ChemOne solution right from the start, ChemOne is designed for productivity right out of the box. In addition, the solution has been tailored for the Indian context, in terms of taxation and compliance norms. As a full-service provider, YASH can get you up and running fast, and for a fixed price and timeline. The implementation is backed by a suite of support services that will help you to derive maximum benefits out of your investment in ChemOne.

As a fully integrated ERP solution, ChemOne delivers a comprehensive real-time view of plant operations inside your company. With full visibility into the entire manufacturing process, you'll know what's in inventory, on the manufacturing floor, down on the dock and out the door.

Everyone from procurement staff and production planners to sales and customer service agents – onsite or offsite – will have a clear view into plant information to set customer expectations, make smarter decisions and control costs.

In addition, tracking and managing plant-wide data makes compliance reporting easier. Integrated processes also tighten the billing cycle.
