- Inventory Age Analysis
- Production Order Cost Analysis

Implementation Approach & Methodology

Innovation & Experience Built-in: Highbar RapidStart Benefits

- Enable to extract more value from SAP investment by implementing solution with right perspective and providing features that address more of core requirements of Core Construction customers in better manner.
- Combines benefits of standard product deployment and organization specific implementation.
- Minimized implementation risks as EC&O developments and implementation will be based on broad-based experience in relevant industry processes and SAP features.
- Apart from increasing operational efficiency, the solution will support build-up of reusable knowledge packages. This will be helpful in multi-skilling and in improving quality of decisions in project planning and execution.

- It will have options for 'Add-ons' for integration with specialized industry application(s).
- The solution will enhance scalability of business processes enabling them to handle more transactions and more risks and higher preparedness for collaborative functioning.
- An out-of-the-box solution deployment on World class Platform, SAP
- Fixed implementation timeframe and cost with predefined scope.
