

IMCEdge

A KPIT SAP Solution- for Industrial Machinery & Components Manufacturers

Developed on SAP ERP, **IMCEdge** is an enhanced solution based upon the “Best Practices” For Industrial Machinery & Components Manufacturers combined with KPIT Cummins domain experience gained from the implementation done in this vertical. The result is a Substantial reduction in the “**Total Cost of Ownership**” through faster implementation, business-ready- scenarios and fewer customizations.

IMCEdge for Industrial Machinery & Components Manufacturers replaces fragmented distributed systems, disparate technologies and manual process with a flexible, scalable & maintainable blueprint solution for Indian Small & Medium enterprise (SME) that lets you add new core process as your business grows. **IMCEdge** puts the power of integrated core business solutions within the reach of mid sized IM&C component companies, no matter what production model is used.

IMCEdge enables adaptive Manufacturing by closing the vital information loop between the plant floor and the enterprise resulting in a real time visibility into crucial business process from design, production and scheduling to inventory, quality and after-sales, allowing quick response to changes.

Industry Segments

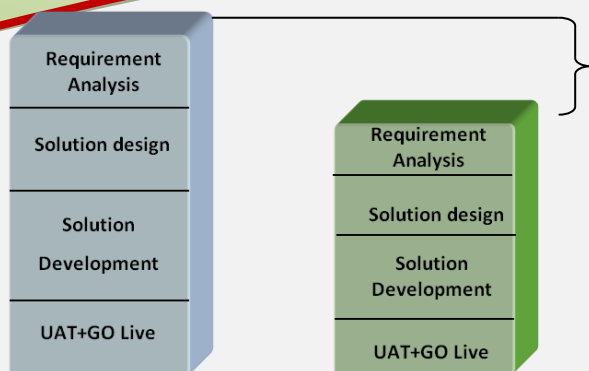

- Industrial Machinery & Components Manufacturers
- Tier I & II Suppliers

Our Templated solutions help you realize *value faster*

- 105+ SAP Best Practice Scenarios & 71+ KPIT developed Biz. Scenarios Configured, Tested and well Documented
- Value of Information making improved
- Improved Response Time for any key decisions
- Integration across functions and processes
- Shorter Implementation Time for lower TCO

IMC Edge

Normal Implementation time

Implementation time with KPIT

● **20% reductions** in implementation time due to time reduction in 3 phases:

- ✓ Requirement Analysis
- ✓ Solution Design
- ✓ Solution Development

● **IMC Edge** – Our **Pre-Built solution** for IM&C Manufacturers **Specific challenges** & with deep **Domain Expertise**

● Extensive, **integrated functionality** with deep industry capabilities

● **Sub-Verticals Covered**

- Industrial Patterns & Pumps & Motors
- Special Dyes & Tools
- Switchgear Apparatus
- Machine Tools/Accessories
- Relays and Industrial Controls
- Ball and Roller Bearings
- Automatic Regulating & Hi-Speed Drive Changes
- Measuring and Controlling Devices NEC
- Measuring and Dispensing Pumps/ Cylinders

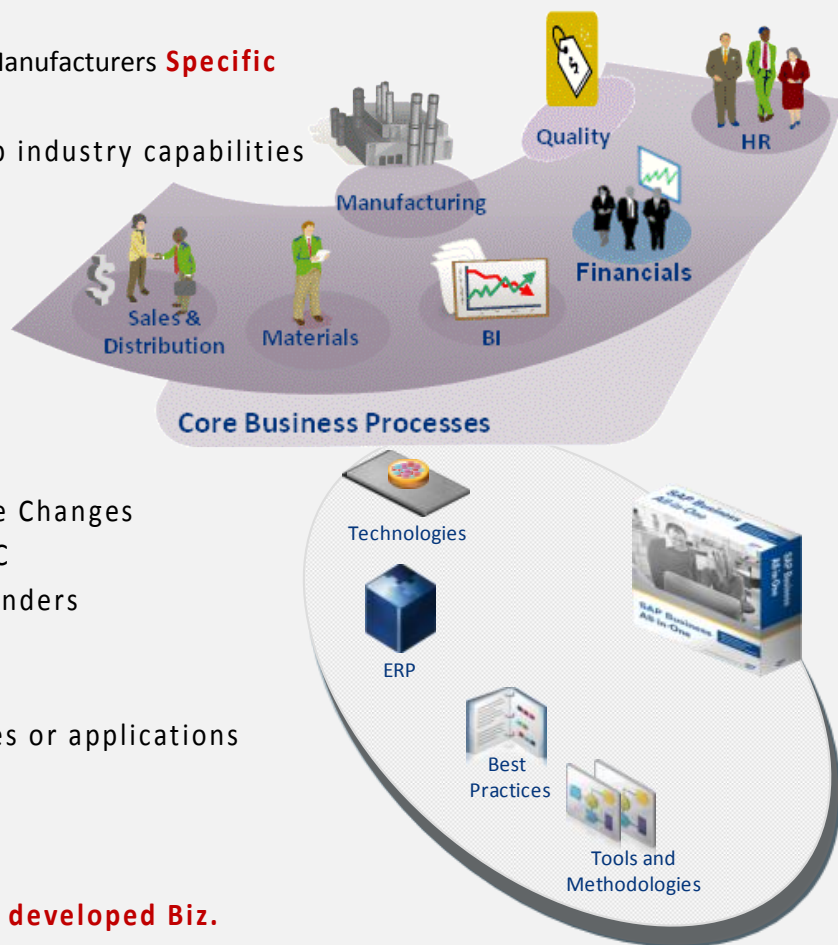

● **Configurable and extensible**

- Configurable roles and processes
- Flexibility to compose unique processes or applications

● **Rapid, predictable deployment**

- Streamlined business scenarios
- Implementation accelerators

● **105+ SAP Best Practice Scenarios & 71+ KPIT developed Biz. Scenarios Configured, Tested and well Documented**
