

PRCEdge

A KPIT SAP Solution- for Plastic & Rubber Products Manufacturers

Developed on SAP ERP, **PRCEdge** is an enhanced solution based upon the “Best Practices” For Plastic & Rubber Products Industry combined with KPIT Cummins domain experience gained from the implementation done in this vertical. The result is a Substantial reduction in the “**Total Cost of Ownership**” through faster implementation, business-ready- scenarios and fewer customizations.

PRCEdge for Plastic & Rubber Products Industry replaces fragmented distributed systems, disparate technologies and manual process with a flexible, scalable & maintainable blueprint solution for Indian Small & Medium enterprise (SME) that lets you add new core process as your business grows. **PRCEdge** puts the power of integrated core business solutions within the reach of mid sized companies, no matter what production model is used.

PRCEdge enables adaptive Manufacturing by closing the vital information loop between the plant floor and the enterprise resulting in a real time visibility into crucial business process from design, production and scheduling to inventory, quality and after-sales, allowing quick response to changes.

Industry Segments

- Plastic & Rubber Products Manufacturers
- Tier I & II Suppliers

Our Templated solutions help you realize *value faster*

- 75+ SAP Best Practice Scenarios & 43+ KPIT developed Biz. Scenarios Configured, Tested and well Documented
- Value of Information making improved
- Improved Response Time for any key decisions
- Integration across functions and processes
- Shorter Implementation Time for lower TCO
