SmartCOMPO

SmartCompo for Component Manufacturers

An integrated and pre-configured ERP solution to manage every aspect of your component manufacturing business

“In our endeavor to have an integrated and scalable solution for all business processes, we selected TVSi's pre-configured SAP ERP solution 'SmartCompo'. This will enable us to leverage the best practices followed by various component manufacturers and benefit from TVSi's experience in the component manufacturing industry.”

***Ms.Arundathi Krishna, Managing Director,
Upasana Engineering Limited***

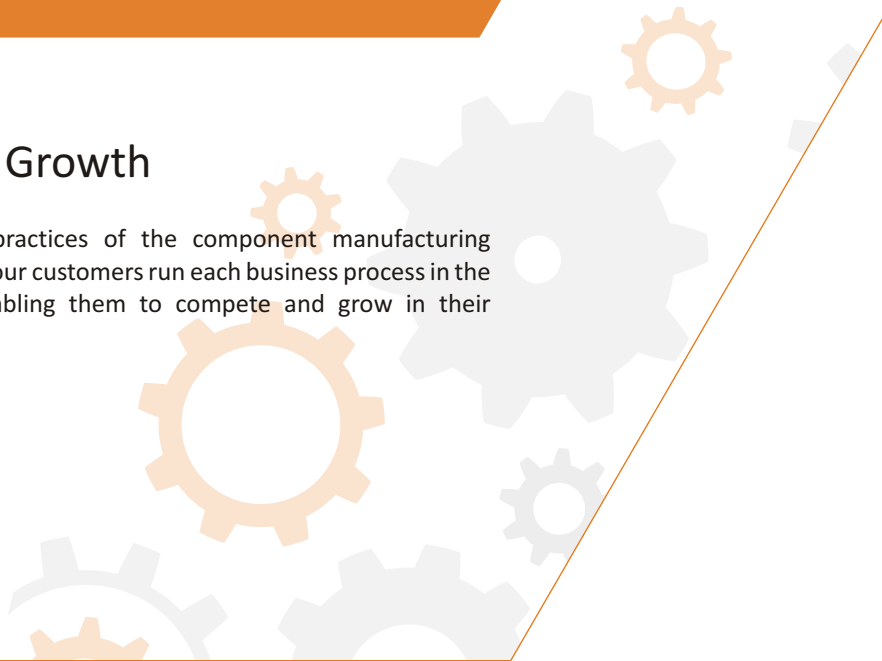

With growth comes needs for IT enablement. As you compete with global enterprises for your share of component market, it becomes critical to increase operational efficiencies for faster turn-around to market.

We believe a strong enterprise resource planning solution lays the foundation for future growth of emerging companies.

Our solution SmartCompo, is a comprehensive, pre-configured enterprise resource planning solution for the component manufacturing industry. SmartCompo as an integrated solution manages every aspect of your business, including your finance, procurement, manufacturing, sales and distribution, and supplier/vendor management.

Enabling your Growth

By incorporating best practices of the component manufacturing industry, we ensure that our customers run each business process in the most effective way, enabling them to compete and grow in their business environment.

De-Risking your investment

When we offer our solution, we also make a commitment to partner with the customer through their IT transformation journey. By providing a preconfigured solution which is tried and tested, we eliminate the complexities and risks which are otherwise associated with an ERP solution implementation.

Quicker realization of business benefits

SmartCompo is specifically designed for component manufacturers which ensures that most of the requirements are addressed by the out-of-the-box offering. This aids in rapid implementation of the solution for the business and helps customers realize business benefits quicker.

Save CAPEX for core business

SmartCompo solution is offered in conventional setup as well as a hosted solution. The option of a hosted solution allows companies to eliminate the capital expenditure on hardware and related software and networking capabilities. In addition to eliminating capital expenditure, an hosted option offers the advantages of running IT with minimal support, eliminates costs related to periodic technology upgrades, addresses the scalability issues of technology, and provides superior reliable services from industry and technology experts.

Reliable technology solutions

SmartCompo is powered by SAP's industry best practices, which is a culmination of SAP's experience working with customers worldwide for close to 40 years. As the world's largest enterprise software company, SAP's software and solutions helps companies run their business better.

Right-Sized for your needs

We believe in providing solutions to our customers that are right fit. Based on our experience working with enterprises in the component manufacturing industry, we understand the specific needs of each business function. SmartCompo is designed specifically for component manufacturers and hence the features and functionalities required for business processes at component manufacturers are pre-mapped and built into the solution. The key business processes such as Order to Cash, Procure-to-pay, Time-to-Market, Forecast-to-stock, Financial & Management Accounting, Annual operation plan & forecast simulation amongst others, are pre-defined in the solution. Our solution is built for flexibility, allowing for fine-tuning of these processes to your specific needs. Also with the online solution configurator, you only select what is required for your business.

SmartCompo Solution Map

Integrated Solution for Component Manufacturing Needs

SmartCompo extends the value of your IT investment in enterprise solutions by providing a comprehensive solution for all your business needs through integrated portals, messaging system, decision support system, control & audit module, and interfaces for EDI, Barcode and Weighbridge. Support for third party product integration allows for workflow and finite scheduling processes. Our solution also addresses the statutory and regional requirements of the business.

Integrated Solution for Component Manufacturing Needs

These value-driven functional extensions enable enterprises to,

- ⬡ Increase collaboration with vendors, customers and employees by bringing in transparency through deployment of vendor portals, customer portals and employee portals
- ⬡ Provide instant notifications through sms and mail to vendors and customers on events such as goods dispatch, payment made, PO release and several other transactions, which helps to avoid calls for status queries
- ⬡ Take quick and informed decisions based on detailed and real-time dashboards & reports
- ⬡ Avoid redundant work and increase quality of relationship with OEM / business partners by adopting EDI

SmartCompo's Value to you

Pre-mapped business functionality - Pre-configured functionality enables rapid implementation to aid in quicker time-to-value

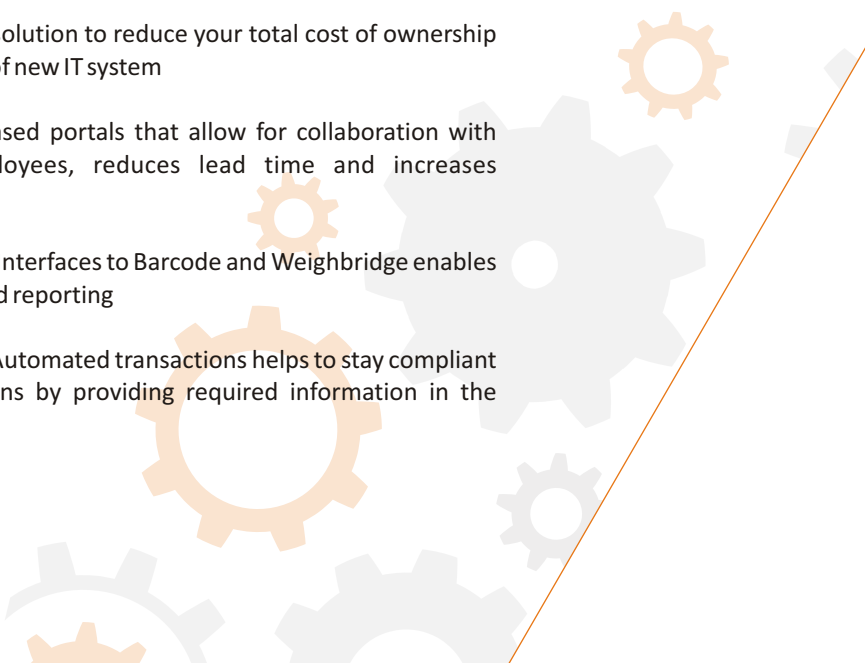

Tried and tested methodology - Eliminates risks associated with ERP implementations

IT as a Service - Hosted solution to reduce your total cost of ownership and ease manageability of new IT system

Portal System - Web based portals that allow for collaboration with vendors/customer/employees, reduces lead time and increases accuracy

Technology Interfaces - Interfaces to Barcode and Weighbridge enables accurate data capture and reporting

Statutory Compliance - Automated transactions helps to stay compliant with statutory regulations by providing required information in the required formats

Business Benefits

Productivity Improvement: Process optimization of business processes to reduce time spent by resources

Informed Decision Making: An integrated solution covering all aspects of your business provides clear visibility and real-time information, enabling quick and better decision making

Increased operational efficiency: Deployment of proven best practices ensure that all business processes run in the most effective manner, also resulting in reduced cost of transactions

Ease of expansion: Built on the SAP platform, the solution can adapt to meet the growing needs of the company

Faster time-to-market: Standardised and streamlined processes enable your business to run quickly and respond to market needs quicker

Grow on your core competence: A reliable ERP system that is aligned with company's business goals, allows for focussed attention on company's core business function
